## corporate information

Atom Lighting brings tomorrow's technology to each of our valued customers through exterior lighting products designed with a commitment to advanced materials and components. Our design and development team recognizes the current need for exterior lighting manufacturers to create products which provide ease of fixture installation, maintainability of fixture mechanisms, and a reliability of fixture performance. We have met that demand!

### Customer Service

Atom Lighting Incorporated excels in customer service and product support. Our knowledgeable staff is attuned to the varied needs of our customers and we strive to meet each and every client request. Whether you are a regional distributor, local contractor or a do-it-yourself homeowner, let our team of professionals assist you with your exterior lighting projects. We look forward to the opportunity to earn your business!

### Inventory Control

Atom Lighting Incorporated holds a complete inventory of each product item at its USA corporate headquarters. Using sophisticated time-tracking technology, we are able to closely monitor circulation from our various international manufacturing sites directly to the product consumer. Our Gilbert, Arizona stocking warehouse provides our personnel the ability to expedite product shipments and evaluate customer trends to ensure quality care is never compromised.

### Distribution Network

Atom Lighting Incorporated diligently supports its expanding distributor network. We offer easy to sell, high quality exterior lighting products for diversified markets at competitive pricing. We work to develop new distributor relationships, meeting consumer demand in previously untapped localities, to acquaint regional installers, architects, and project owners with our lighting products and superior service.
